Introduction

All users requesting services of the Open Science Grid must abide by a common set of basic rules. This document lists those basic rules.

Users Agreement

- (1) You may only perform work, or transmit or store data consistent with the activities and policies of the Virtual Organizations of which you are a member, and only on resources authorized for use by those Virtual Organizations.

- (2) You will not attempt to circumvent administrative or security controls on the use of resources. If you are informed that some aspect of your grid usage is creating a problem, you will adjust your usage and investigate ways to resolve the complaint.

- (3) You will immediately report any suspected compromise of your grid credentials or suspected misuse of grid resources to incident reporting locations specified by the Virtual Organization(s) affected and credential issuing authorities as specified in their agreements and policy statements.

- (4) You are aware that resource providers have the right to regulate access as they deem necessary for either operational or security-related reasons and that your use of the Grid is also bound by the rules and policies of the organizations through which you obtain access, e. g. your home institute, your national network and/or your internet service provider(s).
