Philippe Canal
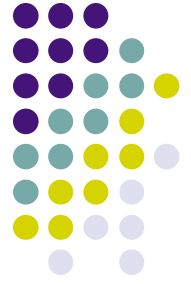

Matteo Melani

OSG 0.4

- Meter library
- Collector v0.1
- Some meters (including Condor)

- Simple data store
  - could/should rely on existing Data Server
- Publisher -> transparent access to the data store
  - Would like to be able to have better reports but need extra help.
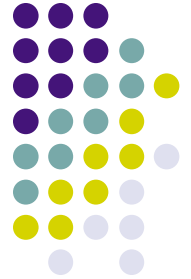

March 2006

- Development of "better" meters
  - Understand limitation (and improve if possible) of existing meters

  - This includes the development of an improved schema and the cross-checking of the validity of the number being accumulated.
    - This will require a strong involvement of the developer of 'data' producer and of site administrators

- Publisher interface
  - Include proper authentification and role checking

- Enhanced Reports etc.

3rd quater 2006

- Continue development of meters, publisher and data store
