

Enabling Grids for E-science

Release and deployment process

Working Group

Łukasz Skitał

EGEE Central European ROC

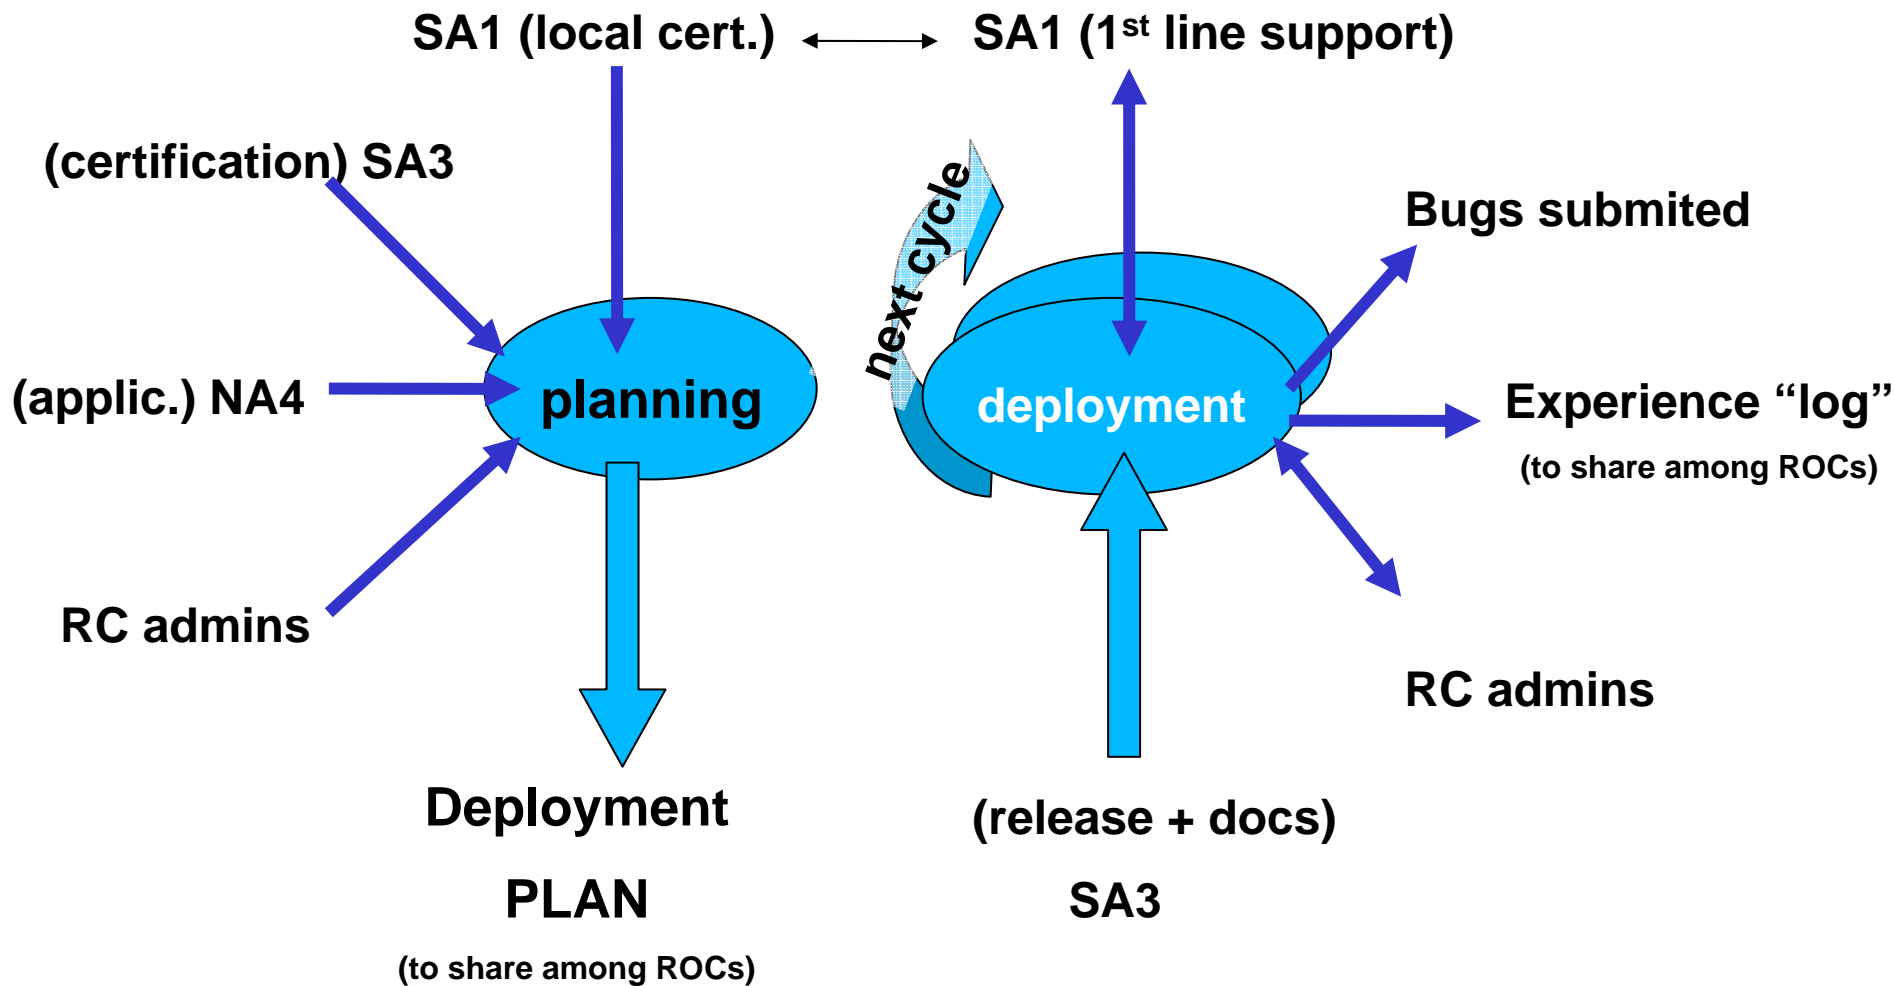

Robert Gardner

OSG

- **Objective:**
 - Timely deployment of new release in the regions
 - Planning
 - Seamless deployment at sites

- **Consider areas of cooperation between EGEE and OSG in the release and deployment process**
- **Consider -**
 - Release processes in detail
 - Analysis of cross-grid dependencies
 - Development of response model for software and service change
 - Publication/notification for cross-grid communication

- **Topics to be discussed with SA3**
 - Requirements from regional certification of middleware releases TSA1.2.2 and Pre-production service site (TSA1.1.2)
 - How can we divide work between PPS and Regional certification, Certification report form, Scope of testing,
 - Interface between ROCs and SA3
 - Deployment documentation/procedures
 - Bug submission, Bug mgmt, Release update plans, Detailed description of newly-introduced services
- **Topics to be discussed with VOs (NA4)**
 - Requirements for deployment **planning**
 - Scheduled VO events, CIC portal for announcing data challenges, VO service/middleware requirements
