Introduction

All users requesting services of the Open Science Grid must abide by a common set of basic rules. This document lists those basic rules.

Users Agreement

- (1) You may only perform work and store data consistent with the charters of the organizations of which you are a member, and only on resources authorized for use by those organizations.

- (2) You will not attempt to circumvent administrative and security controls on the use of resources. If you are informed that some aspect of your grid usage is creating a problem, you will adjust your usage and investigate ways to resolve the complaint. You will immediately report any suspected compromise of your grid credentials (security@opensciencegrid.org) or suspected misuse of grid resources (abuse@opensciencegrid.org).

- (3) Resource providers have the right to regulate access as they deem necessary for either operational or security-related reasons.
